Subject: PG&E Requests for Generators and Outreach

Good morning –
Thank you for the great discussion this morning about the PG&E Settlement Fund requests. The group decision is to move each of these forward to the Board for consideration on June 8. **Please see options below and respond by the end of the day tomorrow**.

Some great points were made about grouping the generators together for consideration. This approach allows us to address the overall need for generators and then reference the facilities where these generators will be deployed. Alternatively, we can present each on its own and talk in more detail about the need and the project. The goal seems to speak to the operational need to generators at critical facilities, which is more Admin or the Department, versus the details of the project, which is more General Services. The two options are outlined a little bit below.

Option 1:
Present the generators as one item for consideration and aggregate the amount of the request. Draft a memo from Admin with a couple paragraphs about each generator (I can do this part) and have Andy present the overall need for generators at critical facilities. Andy can either present the full presentation with GSD, Fire, and IS there to answer questions, or, it can be a joint presentation with Andy and Grant with Fire and IS there to answer questions.

Option 2:
Present each generator project as its own request and either have Grant present them with Admin, Fire and IS there to answer questions or Admin, Fire and IS present them with Grant there to answer questions. This would either by one memo from GSD or multiple memos from Admin, Fire, and IS.

The request from Fire for outreach could come before or after the generator request(s). Please note that as part of the agenda item we will need a match commitment for each HMGP application separately (there are four total)

I am in favor of option 1 as it makes the overall presentation of the item run more smoothly and doesn't pit the projects against each other for funding.

Also, we are going to have to pull Bloomer. Cindi confirmed we cannot supplant funds.

We have a few other items to follow up on, so please go ahead and respond to be directly with these answers.

- Brian/Sang - Does the EOC lose power?
- Be prepared to answer the question of if we would stay in an EOC operating on a generator if the rest of the services around us were not available.
- Change CAL FIRE/ Butte County Fire to BCFD.
- Add more context in the outreach item for how this relates to Chapter 38A.
- Brian - would the Fair be using this generator?
- Brian- what are the other sources of funds for fairground and how may they impact this request?

Thanks
Casey
